Research Center, Institute and LMC Functioning Under Ford Foundation Grant

Wilkes took a giant stride forward recently when the Ford Foundation granted \$150,000 to the college for the support of three projects — the Area Research Center, Labor-Management-Citizens Committee, and the Institute of Municipal Government. All three maintain offices in Parrish Hall.

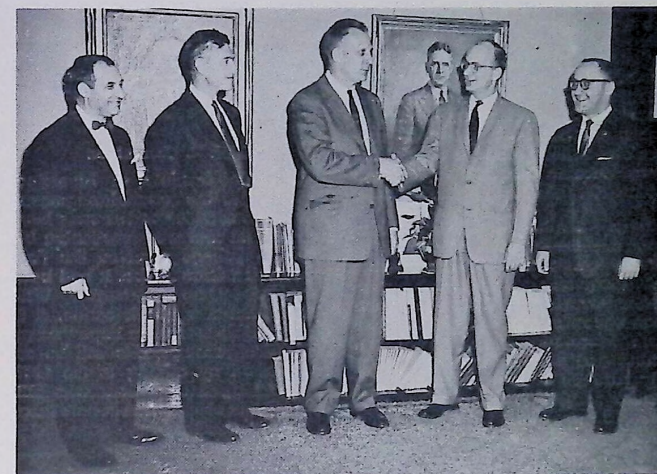

Both the Institute of Municipal Government and the Labor-Management-Citizens Committee appeared upon the campus and community scene several years ago, but the Center began to function only since December 1, 1960, when Herman L. Otto, former Research Director of the Central Division, Pennsylvania Economy League, officially took over as Executive Director. These three organizations have become an integral part of a three-pronged research and redevelopment drive to bolster the economy of the Greater Wilkes-Barre area.

Area Research Center

For many years, social agencies, Greater Wilkes-Barre Chamber of Commerce, Wyoming Valley United Fund, the Industrial Fund and other civic organizations have recognized the need for a research center keeping abreast of the times with up-to-the-minute statistical reports and surveys which can be made available to such organizations requiring this information.

The purposes of the Center are: (1) to coordinate the many studies of community problems and trends so that the results will always be available to interested parties; (2) to assure continuity of studies so that long-time trends may be known and their significance on the local and national scene may be understood; (3) to make special studies for public and private groups, including municipalities, Greater Wilkes-Barre Industrial Fund, corporations, labor organizations, the Economy League, school boards, and so forth; (4) to cooperate with the Luzerne County Planning Commission and that of the City of Wilkes-Barre, and many other groups too numerous to mention.

The paid staff will provide professional direction, and secretarial and

Three offices in Parrish Hall are partially maintained from a recent grant of \$150,000 by the Ford Foundation. They are the Area Research Center, Labor-Management-Citizens Committee, and Institute of Municipal Government. Above, in the office of the President, directors and administrators of the three offices meet with Dr. Farley. Left to right: Dr. Hugo V. Mailey, Director, Institute of Municipal Government; Dr. Samuel Rosenberg, Director, Labor-Management-Citizens Committee; Dr. Farley, Herman L. Otto, administrative head of the Center; Philip R. Tuhy, Instructional Assistant, Institute of Municipal Government.

research assistance, and its studies will be conducted in cooperation with the County and City development agencies.

Although funds for the Ford Foundation will support the Center for five years, because of its importance and impact upon the community, it is hoped that the Center will eventually attract sufficient public and industrial support to make the office self-supporting within six years at the most.

Herman Otto, Director

A native of Cleveland, Ohio, Herman L. Otto, Director of the Center, was educated in Pennsylvania State University where he was graduated in 1942 with a B.A. degree in Commerce and Finance. In the Philadelphia and Pittsburgh areas, from 1947 to 1955, he administered single county programs for the Pennsylvania Economy League. Since 1955, he has been directing the development

and administration of applied research programs aimed at improved governmental management in the metropolitan areas of Central Pennsylvania.

Mr. Otto, a veteran of World War II, served in the European Theater of Operations from 1943 to 1946. He was recalled to active duty for two years during the Korean War as a member of Pennsylvania's 28th Division. He was released from active duty in 1952 with the rank of Major. Mr. and Mrs. Otto with their four children reside in Dallas Township.

Institute of Municipal Government

Founded in 1951, the Institute of Municipal Government also derives support from the Ford Foundation for three years. The Institute was established to serve in an advisory capacity to local government officials so that they may be fully acquainted with the practices in government that have been tried and proven in other

communities. Over the years, some three hundred officials from seventy-five per cent of the municipalities of Luzerne County have come to recognize that sound economical government is an essential element in the economic rebirth of the area and have continued their participation in the work of the Institute.

Recent experience, however, suggested that the effectiveness of the work could be increased were it possible to give greater assistance to public officials in adopting the policies and techniques with which they have become acquainted through the monthly meetings of the Institute.

Today, thanks to the Ford Foundation, the Institute (1) maintains a service center that will cooperate with local officials including supervisors, township commissioners, borough councilmen, township and borough secretaries, school directors, zoning and planning officials, township and borough auditors, police, health, magistrates and other officials; (2) publish the Luzerne County Newsletter for circulation to all public officials within Luzerne County; (3) maintain a center for conferences, lectures and discussions relating to major questions in the improvement of city, borough and township government; (4) maintain an advisory and consulting service for local units of government and for associations and officials actively concerned with the work of such units; (5) maintain a carefully selected collection of contemporary printed materials relating modern local administrative techniques and general information in the field of local government administration; (6) complete studies and preliminary phases of research in the field of local government in Northeastern Pennsylvania; (7) expand the activities into new phases of citizenship and adult training which will alert the individual to governmental problems.

Philip R. Tuhy

To expand the work of the Institute, Philip R. Tuhy, former Senior Planner of the Luzerne Planning Commission, was appointed Instructional Assistant.

A native of Wilkes-Barre — the son of Reverend and the late Mrs. Stephen Tuhy, the new appointee was graduated from Coughlin High School, received his B.A. Degree in Political Science from Valparaiso University and Master Degree in

Governmental Administration at the University of Pennsylvania.

Before joining the Luzerne County Planning Commission, Mr. Tuhy was Assistant Borough Manager at Downingtown, Pennsylvania, where he conducted a research program for that community.

From July, 1954 to June, 1956 he served in the U. S. Army. A member of St. Matthew's Slovak Evangelical Lutheran Church, he is recording secretary of the Church Council.

L.-M.-C. Committee

Like the Institute of Municipal Government, the Labor-Management-Citizens Committee had already been established and was functioning before the College received the Ford Foundation Grant. Too, it had been accepted by the community. With Ford Foundation participation, it is now possible for further improvement and effectiveness. This will be accomplished by adding to the LMC staff a trained consultant who will seek the full cooperation of both labor and management in the area.

Dr. Samuel Rosenberg

Since its inception, the Labor-Management-Citizens Committee under executive directorship of Dr. Samuel Rosenberg has become one of the most effective tools in the community's industrial development program. Prior to the Ford Foundation grant, it was supported by funds furnished by the Greater Wilkes-Barre Chamber of Commerce through the latter's industrial divisions. It was and still is, however, completely autonomous in its operation.

Not only has the Committee been responsible for establishing a rapport between management and labor and has resolved disputes before they led to bitterness and unnecessary loss to both sides, it has also received many inquiries from state governments and industrialists of the nation requesting information relative to its structure and operation. This augurs well for both community and college.

When the Committee was organized, it was the original intention that each labor group and each industry be invited to consider its services whenever a strike threatened or a misunderstanding developed. Unfortunately, heretofore, time and personnel have not been adequate and there are still groups who are unaware of the services available to them. The obvious result is that strikes which might have been

avoided have taken place before the Committee has been invited to participate. With an additional, full-time consultant, this situation can and will be corrected.

Advisory Council

Future plans call for special programs and institutes for the mutual benefit of labor, management and the community.

To further integrate the work of the college with that of the community, late in December Dr. Farley announced at a luncheon meeting in Hotel Sterling an Advisory Council for Office of Community Services. The council, comprising public officials, business and professional men active on the community front, will develop and coordinate plans for the Office of Area Research, the Institute of Municipal Government, and the Labor-Management-Citizens Committee.

Those named to the Wilkes College Advisory Council are: Judge Bernard Brominski, Frank Burnside, Guthrie Conyngham, Alfred Darte, Frank Earnest, Dr. Eugene S. Farley, Congressman Daniel Flood, Ray Hodgson, Attorney Andrew Hourigan, James Kenny, Attorney Jarrett Jennings, Horace Kramer, Allen Larsen, Dr. Hugo Mailey, Senator Martin Murray, Herman Otto, Dr. Samuel Rosenberg, Attorney Louise Shaffer, Patrick Shovlin, Attorney Arthur Silverblatt, Rev. Edgar Singer, Mayor Frank Slattery, Harold Tippet, Philip Tuhy, and Samuel Wolfe.

Michellini, Cohen Present Papers On Allergy Problems

Dr. Francis J. Michellini and Dr. Sheldon G. Cohen, both associate professors of the Department of Biology, recently presented papers before the American Academy of Allergy meeting in Washington, D.C. The meeting was held in the Statler Hilton Hotel February 6, 7, 8.

Dr. Michellini reported on "Histological Studies on the Ragweed Pollen Grain in Evaluation of Extracting Procedures".

Dr. Cohen's paper discussed "reactions of tissue sensitization".

Both professors are authors of a number of articles published by several medical journals. Dr. Michellini joined the faculty in 1955; Dr. Cohen, in 1957.

Reflections of a Fulbrighter

Editor's Note: As our readers already know, Dr. Stanko M. Vujica, Head of the Philosophy and Religion Department, is spending a year as a Fulbright research scholar in Pakistan and India where he is studying the various oriental religions. We asked Dr. Vujica for a brief message on his impressions.

From childhood on I have associated the Orient with things bizarre, colorful, picturesque and exotic — a world of queer fascination. Now that I have seen it and lived in it, this image of my imagination has given way to a more sober vision. Asia, at least the part of it I have visited thus far, lacks sensual beauty; her austere and dark charms lie deep below what meets the eye. Moreover, a lover of the picturesque finds his pleasure disturbed by the discordant note of the ever-present evidence of human misery.

One of the most famous excavation sites in the world is Moenjodaro, the "city of the Dead", deep in the desert of Sindh in West Pakistan. It was probably the oldest city in the world, pre-dating by several centuries the arrival of the Aryan hordes in the Indus Valley. The Moenjodaro civilization has a good bath and drainage system in citizens' homes. The use of cotton for textile existed two or three thousand years before Europe learned of it. The two human statues from Harappa, the sister city of Moenjodaro in the Punjab, were not matched till the classic age of Greece.

During the last four months in Pakistan, I have often wondered why it is that at this very spot man had a better drainage five to six thousand years ago than he has now? Why is the standard of living on the Pak-Indian subcontinent so low? Why so much squalor and poverty? Many factors have contributed. The climate of the subcontinent is enervating; for a larger portion of the year, in order to survive, man must avoid any strenuous activity. Negativistic and world denying outlook inculcated by such religions as Buddhism and Hinduism may have accentuated the tendency towards withdrawal and passivity. Mr. Nehru in his book "The Discovery of India" places the greatest blame on the British rule. He points out that the British policy of closing its market to Indian products eliminated the need for Indian craftsmen and artisans and they drifted to the already overpopulated land. India became pro-

gressively ruralized. In every progressive country there has been, during the past century, a shift of population from agriculture to industry. In India this process was reversed. This, Nehru feels, is the fundamental cause of the appalling poverty of India. Whatever the reasons, two developments occurred in the West but failed to materialize in Asia — the industrial revolution and the growth of modern science. This accounts for the backwardness of Asia. Asia was not without wealth, but it was chiefly in land and jewelry — this could not be taken away by invaders and plunderers. Asia needs a long period of political security if its wealth in gold and minerals is to come out of hiding and move into the factories.

But there is one more aspect of this whole program. In almost every conversation I have had on this matter with my oriental friends the argument is put forward the essence of which runs something like this. Asia is a home of the two oldest living civilizations — the Chinese and the Indian. Although they are centuries older than the so-called Western Civilization, they are still strong and thriving while it is the Western scholars themselves who are now predicting the approaching end of their society. How then can the young, inexperienced and untried West lecture Asia on the art of good living? Surely the people of Asia lack gadgets and conveniences and now that modern technology has made them available on a large scale, they will soon get them. But Asia has not succumbed to the materialistic fallacy which equates happiness with physical comfort. As one Pakistani put it to me, "The saying of Jesus, an Asiatic Himself, that one must seek first the kingdom of God and its righteousness, was understood and followed in Asia while the West failed even to understand its meaning." When it comes to spiritual treasures, inner resources and peace of mind, the East is richer than the West. Communism, the greatest curse of our age, is but a logical extension of the materialistic orientation of the West, and is one

of the many doubtful gifts that the East has received from the West. Thus runs their reasoning.

It would, of course, require a whole book to even begin to deal with this whole complex problem of the "spiritual East" versus the "materialistic West". The search for the right balance between the demands of the body and those of the spirit has been the perennial goal of all philosophies and religions; this search will go on. In my own judgment the spiritual or any other greatness can not be founded on lack of freedom and opportunity, or on starvation and misery. In their preoccupation with the things of the mind the sages of Asia lost themselves in a sea of speculation unconnected with the day to day problems of life and the needs of men and women. Be it as it may, however, such criticisms are largely beside the point. The important thing is the awareness that East and West represent two different attitudes to life, two different approaches to the ultimate value — truly two mental universes.

The problem is not how to eliminate these differences, but how to live with them. In a culturally pluralistic world cultural coexistence is a necessity. There are many hopeful signs in both the East and the West that we are moving towards ever greater understanding of this fact.

A Pakistan judge, who had spent a few months in Swarthmore, Pennsylvania, as guest of the Friends, likes to quote an old Quaker lady, who, he felt, told him the wisest thing he heard in the States. "We used to expect you," she told him, "to become converts to our religion and our way of life. Now we expect something even more difficult; we want you to understand and perhaps even like our way of life although you have not been converted to it. You see, we are all seekers after truth now."

An increased awareness of how profoundly one man can differ from another, and a renewed determination to respect the opinions of those who most differ from me is probably the greatest personal insight I have gained during my stay in the Orient.

Stanko M. Vujica

Lahore, January 1, 1961

SIX NEW NAMES APPEAR ON FACULTY ROSTER

Dr. Daniel Detweiler

Dr. Daniel Detweiler has been named professor of Physics at Wilkes and will be in charge of the planning of the graduate program and the extension of the Stark Hall facilities.

Dr. Detweiler is a native of Woodbury, Pennsylvania. A graduate of Mercerburg Academy, he matriculated at Swarthmore College from which he received the Bachelor of Arts in Physics in 1949, followed by a Master of Science in Physics at Yale in 1950. He received from Yale also the Doctorate of Philosophy in 1952. During his studies at Yale, he was a pre-doctorate fellow in Physics under the sponsorship of the Atomic Energy Commission.

From 1953 to 1954, Dr. Detweiler served as project leader in the Semi-Conductor research project of the Franklin Institute in Philadelphia. In 1954 he was named Associate Professor of Physics in the College of Ceramics at the State University of New York at Alfred. At present, Dr. Detweiler carries a \$15,000 annual research grant as principal scientist in the basic research program sponsored by the Office of Scientific Research of the Air Research and Development Command, United States Air Force. He expects to continue this work at Wilkes.

He is married to the former Anne Meckes of Marlboro, New York. They have three children: Lynn, 8, Paul, 6, and Susan, 4.

Dr. Julien A. Ripley, Jr.

Dr. Julien A. Ripley, Jr. was named Associate Professor of Physics. Dr. Ripley comes to Wilkes from Abadan Institute of Technology, Abadan, Iran, where he was professor and chairman of the department of Physics and Mathematics. Dr. Ripley is a native of New York state, a graduate of St. Paul's School and Yale University where he was elected to Phi Beta Kappa and as associate in Sigma Xi. He received his Master of Arts degree from Harvard University and the Doctor of Philosophy degree from the University of Pennsylvania. He also did graduate work at George Washington University as

well as Columbia University and the Oakland Institute of Nuclear Research. Before going to Abadan Institute where, in addition to being chairman of the department of Physics and Mathematics, he was chairman of the curriculum committee. Dr. Ripley served as associate professor of Physics at Dickinson College where he was also a member of the curriculum and policy committee.

He is a grandson of Alexander Graham Bell and a nephew of the Gilbert Grosvenors of the National Geographic Magazine.

Dr. William L. Edgerton

Dr. William L. Edgerton was recently named Professor in the English Department. Dr. Edgerton received his A.B., M.A., and Ph.D. degrees from the University of Pennsylvania. Before coming to Wilkes, Dr. Edgerton was associate professor of English at Norwich University, Northfield, Vermont. The new professor of English has held a Research-grant-in-aid at Norwich University in 1954, and at Duke University in 1956. Dr. Edgerton is a member of the Modern Language Association, Renaissance Society of America and the American Association of University Professors.

Published articles:

"The Apostasy of Nicholas Udall"

"Shakespeare and the Needle's Eye"

"Nicholas Udall in the Indexes of Prohibited Books"

"The Calendar Year in Sixteenth-Century Printing"

Howard A. Swain

Howard A. Swain, Jr. has been named Assistant Professor of Physical Chemistry at Wilkes. He is a graduate of Grove City College and is presently working toward a doctorate in Physical Chemistry which will be conferred this year by the University of Pennsylvania. Mr. Swain, for the last three years, has served as an instructor in Physical Chemistry and general chemistry at the University of Pennsylvania.

He is married and has two children.

Dr. Carla Pierone

Dr. Carla Pierone, who joined the foreign language department as a French and Spanish instructor, has had a varied background in European education. Dr. Pierone studied at the Sorbonne in Paris, at the University of Madrid, and received the Doctor of Philosophy degree in Romance Languages from the University of Turin, in Northern Italy.

Younsou Koo

Younsou Koo has been named an instructor in the Engineering department. Younsou Koo received his engineering certificate from Wilkes in 1956, B.S. in Civil Engineering from Swarthmore College in 1958; and M.S. in Civil Engineering from the University of Illinois in 1960.

Before coming to Wilkes, Younsou Koo served as a research assistant at the University of Illinois, College of Engineering.

New Institute Proposed By Dr. Thatcher

Dr. Harold W. Thatcher, Chairman of the Department of History, has proposed to the President the creation at the College of an Institute of International Studies. The idea has already received the approval of other members of the History Department. When final action is taken on the proposal, The Alumnus will bring you the detailed story.

This much may be told, however. Originally, the idea was conceived by Dr. Bronis Kaslas and discussed in detail with Dr. Thatcher. Its final form will represent the collaboration of these two faculty members.

The Institute as conceived will be a new major, consisting of all courses offered by the College dealing with international affairs, foreign policy, alien cultures — to mention a few — plus new courses dealing with Latin America, Central and Eastern Europe, the Near East and Africa. All these, of course, in addition to the usual general-education courses.

Amazing as it may seem, the proposed Institute may be put into effect at no additional expense.

New Jersey. Pete, a seasoned performer and stage manager, lives at 240 West Lindsley Road, Cedar Grove, New Jersey, and is a member of the faculty of Peterson, New Jersey schools.

Mrs. Daniel Tapper (Nancy Lee Hannay) has been appointed assistant professor of mathematics in the College of Arts and Sciences, Ithaca College. A dean's list student at Wilkes, Mrs. Tapper is the holder of the Mathematics Achievement Award and the Mathematics McKane Scholastic Award, given in recognition of her high academic achievements. She and her husband reside at 1406 Hanshaw Road, Ithaca, New York.

Leonard J. Mather is employed as a psychologist at the Child Guidance Clinic at Miami, Florida. In the evenings he is in private practice at the Granada Psychiatric Clinic as a psychological consultant and play therapist.

Charles A. Zezza has been appointed group manager in Albany, New York, for Connecticut General Life Insurance Company. He will direct the planning, sale, and administration of group insurance and retirement plans for all types of business and industrial firms.

1955

Arthur J. Hoover recently received his Master of Education degree from Pennsylvania State University. Art is presently a member of the Wilkes faculty.

Dr. Sandy A. Furey has been granted a license to practice medicine and surgery after passing the State Board Examinations administered in July. He has opened offices at 600 Main Street, Moosic. At Wilkes, Sandy was editor of the Manuscript for two years, and was named to "Who's Who in American Colleges and Universities." He is married to the former Elaine Witak, and has a son, Sandy, III.

Russell R. Picton, former Executive Alumni Secretary and Director of Development at Wilkes, is now Director of Development at Randolph-Macon Women's College in Lynchburg, Virginia. Russ is residing at 2461 Rivermont Avenue, Lynchburg, with his wife and two sons.

Dr. John Blaker has been appointed to the President's Advisory Committee for 1959-1960 at Fairleigh-Dickinson University. The Committee serves to advise the President on any matters concerning faculty and university welfare. Dr. Blaker is an Assistant Professor of Physics at the University.

Patricia A. Fox is teaching Guidance in the Dallas School District, Dallas, Pennsylvania. Pat will receive her Master's degree in elementary school guidance from Columbia.

Morris Hollander has received word that he has passed the Pennsylvania CPA examination. Morris is associated with Laventhol, Krokstein and Company, certified public accountants, Wilkes-Barre.

MARVIN C. REES has been selected from more than 25 applicants as the Adult Delegate to accompany the Philadelphia delegation to a European CIVS camp this coming summer. Mr. Rees is Director of Physical Education at

the Oak Lane Country Day School and faculty representative to the Parent Association.

Allen Feld is pursuing courses which will lead to a Master of Social Work degree from the University of Pennsylvania School of Social Work.

The Northwestern Mutual Life Insurance Company of Milwaukee has promoted Alexander Y. Cathro to the position of head of the District Agency in the Philadelphia area. Mrs. Cathro is the former Carolyn Ruth Walling.

Neil J. McHugh of 126 Ridge Avenue, Plainfield, New Jersey, a mathematics teacher at Scotch Plains - Fanwood High School, has accepted a National Science Foundation Scholarship to Montclair State College for a Summer Institute for secondary school mathematics teachers.

1956

The speaker for the Anthracite Conference of The Association for Bank Audit, Control and Operation was Reese D. Jones. Reese is affiliated as an account administrator for Studley, Shopton and Company, Inc., a firm of investment counsellors located in Boston and Philadelphia.

Mrs. Paul Beers, the former Joan Shoemaker, has been appointed guidance counselor at the Lower Dauphin Joint High School, Hummelstown, Pennsylvania. Her husband, Paul Beers, is a reporter for the Harrisburg Evening News.

George H. Batterson, Jr. has been promoted to promotion and advertising manager by UARCO, Inc., manufacturer of business forms. He is married to Laurelle-Ann Sorenson.

Robert Darrow, Delhaas High School language teacher, recently addressed the weekly luncheon session of the Levittown-Fairless Hills Rotary Club. He spoke of post-war changes in West Germany. He teaches German and English at Delhaas.

Robert J. Doon received the degree of Doctor of Medicine from the University of Pennsylvania School of Medicine in Philadelphia this summer. He is serving his internship at the Dr. W. H. Groves Latter Day Saints Hospital in Salt Lake City, Utah.

Richard Jones is a member of the faculty of North Hunterdon Regional High School, New Jersey. Mrs. Jones (Naomi Kivler) is on the faculty at Franklin Township Schools.

Lawrence Turpin has come up with a gadget he claims will banish forever not the drip, drip, drip of the leaky faucet, but the noise it makes. His invention was patented in 1950. Larry is now an assembly foreman at the Jersey Dye & Casting Corp., in Irvington, New Jersey.

Charles E. Neely is a professional service representative of Pfizer Laboratories, a division of Charles Pfizer & Company, Inc. He and his wife, Genny, have a daughter, Nina Anne and live at 24 Love Lane, Norwood, Pennsylvania.

Paul L. Shiffer has accepted a position as Band Director with the Gilbert Public Schools

in Gilbert, Arizona. He had begun work on his Master's degree in New York State and hopes to continue his studies at Arizona State University. He and his wife, Carol Ann Gardner, have three children.

1957

John J. Bucholtz will enter the political science department at Mount Holyoke College. He has been an assistant in instruction in the department of politics at Princeton University. Johanna Broske, director of nursing service and education at Pottstown hospital, has been awarded a masters degree in education from the University of Scranton.

Marilyn Williams is a biology teacher at New Brunswick Senior High School, New Jersey. She had been selected to attend and participate in a national biology curriculum conference at Boulder, Colorado, sponsored by the National Science Foundation, and will be part of a group planning a new biology program for high school students.

Marvin Z. Kurlanchek has been elected to the James A. Gibson Anatomical Society for outstanding work at the Medical School of the University of Buffalo, New York. Membership in the society is limited to twelve outstanding medical students selected annually from the student body by members of the school faculty.

A new faculty member at Belleville, New Jersey, schools is Mrs. Bess Elstathion (Eess Profers).

Richard Mangamella has been appointed by the New Brunswick, New Jersey, Board of Education to teach sixth grade at Bayard School.

Jack P. Tippet has been notified that he successfully passed the 1959 C.P.A. examinations. He is employed with the firm of Price Waterhouse Company, at its Pittsburgh office.

John J. Federovich, Jr. has received a bachelor of science degree in chemical engineering at the mid-year commencement of Pennsylvania State University. He is employed by Air Products, Inc., Allentown.

Eugene Roth was admitted to practice law before Luzerne County courts recently on motion of Atty. Joseph J. Savitz. Class of 1948, the young attorney's preceptor. He is associated with the law firm of Rosenn, Jenkins and Greenwald, Wilkes-Barre.

Chief Justice Earl Warren of the United States Supreme Court has chosen Jesse Choper to be his law clerk. Prior to his appointment by Chief Justice Warren, Jesse had accepted a teaching position at University of Minnesota Law School, which granted him a leave of absence so that he may fulfill his new duties in Washington.

Joseph J. Szostak is music director of the Ocean Township School, Oakhurst, New Jersey, and is the director of the chorus and band at that school.

Lewis Rinehimer has assumed the position of Controller for the Levinson Brothers stores in Pennsylvania. Before establishing offices in Warren, he was employed as an auditor

for Price Waterhouse & Company, of Pittsburgh, for four years.

1958

Donald Domzalski has been appointed to the faculty of the Andover Consolidated School, Andover, New Jersey. Don will teach seventh and eighth grades (Social Studies). He assumed his duties on December 1st. He is presently doing graduate work at Seton Hall University, East Orange, New Jersey.

Ronald A. Olson has been accepted for the study of medicine at Hahnemann Medical College and Hospital of Philadelphia. Ron undertook graduate studies in microbiology at Syracuse University where he was awarded a teaching assistantship and was a member of Pi Sigma Bacteriology and Botany Honorary Society.

Albert F. Kaiser received his Bachelor of Science degree in Chemical Engineering from Michigan College of Mining and Technology.

John W. Pieplow received his Bachelor of Science degree in Automotive Engineering from Tri-State College, Angola, Indiana.

1959

Michael Goebic, associated with Johnson and Johnson Company, is a part-time faculty member at Rutgers University, New Brunswick, New Jersey.

George Black is teaching fourth and fifth grades in the Haycock School, Quakertown, Pennsylvania.

David Williams is teaching mathematics and general science at Neptune High School, New Jersey.

James S. Hannon is teaching eighth grade English and social studies at Carl Sandburg High School, Nesheim, Pennsylvania. He previously taught in Greene Centre, New York.

Gwen W. Evans has been awarded a Woodrow Wilson Fellowship for one year's study at any university of her choice in the United States. She had been in France on a Fulbright Fellowship grant, teaching school. While at Wilkes, Gwen attained a 4.00 average, the highest possible.

Mrs. Vincent Drapiewski (Barbara Ann Cudde) is studying medicine at The Women's Medical College of Pennsylvania.

Pursuing courses which will lead to a Master of Social Work degree at the University of Pennsylvania School of Social Work is Leonard Majikas.

John F. Schade is a second year student at Hahnemann Medical College, Philadelphia.

Patricia Ann Yost has been awarded a Graduate Fellowship by the National Science Foundation for the academic year 1960-1961. She is a student at Pennsylvania State University under an assistantship grant and is studying experimental psychology, minoring in mathematics.

James L. Eidam is serving as instructor-librarian at Wilkes. He is presently taking courses toward his master's degree in Library Science at Columbia University.

Stanley J. Wintergrass received his bachelor of science degree in engineering-physics from Pennsylvania State University. He is presently attending Rensselaer Polytechnic Institute, Troy, New York, where he is working toward his doctorate in atomic and nuclear physics. He is employed by General Electric Corporation, Schenectady, New York as a nuclear physicist.

1960

Stephen Poleski was appointed to the faculty of The Eisenhower School, Gettysburg, Pennsylvania, as a high school art teacher.

Ensign Robert V. Stevens was graduated from Officer Candidate School, U. S. Naval Base, Newport, Rhode Island.

Roger A. Cease was appointed to teach mathematics and science by the Bordentown High School, New Jersey, School Board.

The 1960 Phillip Salsburg Memorial Scholarship has been awarded to Jerome R. Gardner. Under the terms of the grant he is to work in an area Lackawanna United Fund agency for two years after completing his training. He will begin graduate study at the University of Pennsylvania School of Social Work.

Richard J. Myers has been appointed as assistant manager of the Wyoming Valley Motor Club. Dick is married to Lois Tremayne, Class of 1957, and lives in Kingston.

Raymond Yanchus has been appointed assistant football coach at Jonathan Dayton Re-

gional High School in New Jersey. Besides his coaching duties, Ray will teach social studies at the high school.

Georganna Sebalke has been appointed to the music faculty of Mountain View Joint School in Montrose, Pennsylvania. Beside teaching music, Georganna will teach a section of junior high school English.

Arthur W. Evans, Robert J. Petroski, Kenneth A. Thomas, Jr., and Stefan J. Hellersperk are attending Bucknell University where they are pursuing courses in engineering.

Thomas Hurley has accepted a teaching position at Neptune City, New Jersey schools.

Emmanuel J. Ziohro has been selected by the State Banking Department for a two-year training program to qualify him as a bank examiner.

(Muriel Emily Rees)

Under the 10-year plan, soon to be made public, an expanded building program has already reached the blueprint stage. Indicative of the rate of growth of the College, is the fact that practically new Stark Science Hall can no longer accommodate the press of students.

Other reports at the meeting included those from Dr. Eugene S. Farley, Wilkes President; Attorney Joseph J. Savitz, alumni representative on the board of trustees of the College; Mrs. Anita Jamerich, secretary; Russell Williams, vice-president; and Leonard Mulcahy, treasurer.

WANTED

We believe the following "Missing persons" are inhabitants of the United States and that they must have at least one friend or relative who might have an inkling of their whereabouts.

CAUTION

These Wilkes College graduates are ROBBING themselves of becoming active members of the Wilkes College Alumni Association. Like KIDNAP victims they have disappeared without a trace. It's MURDER to try to locate them, so won't you please help — come forward and help us to bring our Alumni mailing list up-to-date.

INFORMATION NEEDED —

Correct name — or married name — if not listed correctly.
Present address — or last known address — or name and address of person who might supply this information.

If you know the whereabouts of any of these alumni, PLEASE notify your Alumni Office NOW!
